

ENVIRONMENT

Spiecapag is in compliance with best practices, standards and regulations for itself, its customers, subcontractors and suppliers.

The following principles of environmental policy Spiecapag are applied:

- Continuous improvement through performance feedback and evaluation practices implemented by the project.
- Minimize environmental impact of activities, products and services and reduce pollution, emissions and waste; that taking into account local and contractual requirements.
- Comply with standards and goals using the best techniques and materials available according to customers' requirements.
- Improve awareness, engage and train employees about the environment.
- Have a responsible management in the mastery of environmental impacts both in procurement, implementation or completion of projects.
- Reduce greenhouse gas emissions, including the assessment of emissions and mature reflection in participating to achieve the VINCI target of 40% reduction of the carbon footprint in 2030 comparing with 2018 (scopes 1 & 2).
- Communicate goals and environmental objectives to employees and external shareholders.

To implement this policy, Spiecapag has established and implemented an Environmental Management System which meets the International standard ISO 14001 requirements.

I pledge to develop environmental control of projects and to communicate to all the objectives and the challenges of the environmental policy.

January 5th, 2021.

Bruno Guy de Chamisso
Managing Director
